```

```
[ ]: import owlready2
```

```
[18]: # A string with double quotation marks

"strawberry"
```

```
[18]: 'strawberry'
```

```
[19]: # There is no output because of ';' for the termination.
```

```
'strawberry';
```

```
[20]: # Therefore you need to use "print" function.
```

```
print('strawberry');  
print('grape');
```

```
strawberry  
grape
```

```
[21]: # How to use quotation marks inside the string.  
# Note: double quotation marks displayed at the beginning and end
```

```
'strawberry's cake'
```

```
[21]: "strawberry's cake"
```

```
[22]: # But if you use double quotation marks inside the string,  
# single quotation marks displayed at the beginning and end, as well as the  
↳ default mode.
```

```
'I said "hello" to him.'
```

```
[22]: 'I said "hello" to him.'
```

```
[23]: # If you use both quotation marks inside the string,  
# single quotation marks displayed at the beginning and end.
```

```
'I requested Mary's mother to say "Please cook a special cake".'
```

```
[23]: 'I requested Mary's mother to say "Please cook a special cake".'
```

```
[24]: # Even both quotation marks are included with a different order,  
# single quotation marks displayed at the beginning and end consistently.
```

```
'I said "Please cook a special cake" to Mary's mother.'
```

```
[24]: 'I said "Please cook a special cake" to Mary's mother.'
```
